ELECTRONIC ARTS®

VIRTUAL PINBALL™

YOU DESIGN YOUR OWN GAME
IN THE ULTIMATE PINBALL ARCADE!

WARNING: READ BEFORE USING YOUR SEGA VIDEO GAME SYSTEM.

A very small percentage of individuals may experience epileptic seizures when exposed to certain light patterns or flashing lights. Exposure to certain patterns or backgrounds on a television screen or while playing video games may induce an epileptic seizure in these individuals. Certain conditions may induce previously undetected epileptic symptoms even in persons who have no history of prior seizures or epilepsy. If you, or anyone in your family, has an epileptic condition, consult your physician prior to playing. If you experience any of the following symptoms while playing a video game — dizziness, altered vision, eye or muscle twitches, loss of awareness, disorientation, any involuntary movement, or convulsions — **IMMEDIATELY** discontinue use and consult your physician before resuming play.

!WARNING

To Owners of Projection Televisions!

Still pictures or images may cause permanent picture-tube damage or mark the phosphor of the CRT (television screen). Avoid repeated or extended use of video games on large-screen projection televisions.

Elect to erase/save game D-PAD LEFT/RIGHT

STARTING THE GAME

1. Turn OFF the power on your Sega™ Genesis™.
Never insert or remove a game cartridge when the power is on.
2. Make sure a Controller is plugged into the port labeled Control 1 on the Genesis Console. Virtual Pinball™ uses only one controller.
3. Insert your Virtual Pinball cartridge into the slot on the Genesis. To lock the cartridge in place, press firmly.
4. Turn ON the power.
The Electronic Arts® logo appears (if you don't see it, begin again at step 1).
5. When life screen appears, press START at any time to begin play.

CAN YOU BEAT THE PROS?

Virtual Pinball isn't just jammed with professionally designed pinball games, we've also included an extra game. We challenged the top video game magazines to a contest: send us the coolest games you can dream up. The winning entry came from the gamers at GamePro®. Our challenge to you is this — play the games by the pros, then step into the Pinball Workshop and design your own winners!

SELECTING OPTIONS

Virtual Pinball has several menus from which to choose options.

1. To highlight an option, **D-Pad** up/down.
2. To cycle through the choices within each option, **D-Pad** left/right.

ENTERING NAMES AND CODES

To save a game, enter a code, or record a high score, use the **D-Pad** to choose and enter the characters.

1. To move to the first character slot, **D-Pad** right.
2. To change the characters, **D-Pad** up/down.
3. To move to the next character slot, **D-Pad** right.
4. To save the game, enter the code, or record a score, press **START**.

PLAY MODE

Press **START** to leave the title screen. The Main menu appears. To play, select the number of players and press **START**. You can also modify the game before you begin.

Choose a Board

Play Choose from one to four players, Enter Code, or the Workshop.

Game Choose from existing games, blueprint plans, or your saved games (there are ten memory slots for saving games).

Parts Change the Parts style for the current game.

Board Select a different Board style.

Skill Change the overall speed of the game.

Action Change the "bounces" on the ball.

Music Select a different soundtrack or turn the Music off.

Changing the Skill and Action

To change the **SKILL** and **ACTION** on a game requires some specific steps.

1. Highlight **Workshop** in the **PLAY** option.
2. Select the game from the **GAME** option on the Main menu.
3. Change the **SKILL** and **ACTION** options with the **D-Pad**.
4. Press **START** twice. The Save Game menu appears.
5. Select a memory slot, give the game a name, and press **START**. The game is saved with the new settings.

How to Play

Once you're into the game the player window appears. Each player gets four balls per game and each plays consecutively. Use only one controller in *Virtual Pinball*. Press **START** to continue.

Launch the Ball

- To put the ball in play, press and hold **A**. The longer you hold the button, the more powerful the launch. To shoot the ball, release **A**.

Keep It Movin'!

- When you lose a ball, press **START** to play the next ball or to continue to the next player's turn.

Quit the Game

- To quit the game during play, press **START**. Select Play or Quit Game with the **D-Ped**, then press any button.

Recording High Scores

At the end of a game, if you beat the current high score, you can record your name as the new champion. See *Entering Names and Codes* on pg. 5 of this manual for instructions.

Progression Games

Three of the games listed in the Main menu add a special spin to your pinball playing: *Compulsion*, *Your Break* and *Flip In*. Beyond each of these games are several progression games. To reach these games, sometimes you need a high score, and sometimes you have to solve a puzzle. Once you've played a progression game and know its name (the name is shown in the player window before each new ball), you can access it from the Main menu.

You need to enter the name of the game in the **Enter Code** option, so it's a good idea to write it down.

1. Select **Enter Code** from the **PLAY** option and press **START**.
2. Use the **D-Ped** to enter the name of the Progression Game.
3. Press **START** and return to the Main menu.
4. Choose the number of players from the **PLAY** option with the **D-Ped**.
5. Press **START** to begin game.

WORKSHOP MODE

Getting Started

1. From the Main menu, select **Workshop** from the **PLAY** Option.
2. Choose a game, a blueprint plan, or a memory slot from the **GAME** option.
3. Select options from the Main menu.
4. Press **START** when you are ready to build.

Choosing Parts

1. Press **A** to display the Part menu.
2. Highlight the desired Part with the **D-Pad**.
3. Press **A** to return to the Workshop board. The Construction tool appears with the chosen Part.

Placing Parts

Feel free to experiment but remember there is a maximum of 256 Parts that can be placed on a board. If you have too many Parts, or if you try to place one in the wrong space, a "FULL" or "NOPE" flag appears.

- To move around the board, use the **D-Pad**.
- To view different shapes, sizes, and angles of the Part, press **B**.
- To attach the Part to the board, press **C**.

Moving Parts

To Destroy a Part:

1. Press **A** to bring up the Part menu.
2. Press **B** to choose the Blester.
3. Use the **D-Pad** to position the tool over the Part.
4. Press **C** and the Part disappears.

To Move a Part:

1. Press **A** to bring up the Part menu.
2. Press **C** to choose the Grabber.
3. Use the **D-Pad** to position the tool over the Part.
4. Press **C** to grab it.

Saving Your Game

You don't have to save your game in order to play it, but it's a good idea. If you exit the game, it disappears forever if you haven't saved it. You can give the game a name up to twelve characters long.

Give Your Game a Name

From the Workshop, press **START** to call up the Save Game menu. Highlight a memory slot, give the game a name, and press **START**. The Main menu appears with the saved game listed in the **GAME** option.

Too Many Games?

If you save a game in a memory slot that already con-

tans a game, you're asked to make a choice. **ERASE OLD GAME?** Use the **D-Pad** to select **YES** or **NO** and press **START**. If you select **NO**, you return to the **SAVE GAME** menu. Choose a new memory slot, or **DO NOT SAVE**.

NOTE: If at any time during the construction process you happen to press **START** and call up the **Save Game** menu accidentally, don't panic: **D-Pad** to the **DO NOT SAVE** option and press **START** twice to return to your board.

Not Just For Building

Before you start playing a game, you might want to get a clear view of the entire game board. You can do this in the **Workshop**. Use the **Construction** tool to move around the board. Just be sure not to change anything, and when you exit, select **DO NOT SAVE** from the **Save Game** menu.

TIPS ON CONSTRUCTION

- Study the layout and design of the existing games to see how **Parts** work together.
- To become familiar with the different **Parts**, start with a simple **Board** and **Part** combination like **Blueprint** and **Classac**.
- When building a board from scratch, place the **Launcher** first and build around it. Build the

walls in a counter-clockwise direction. The **Wall Part** rotates in this direction so you can build quickly and efficiently.

- Don't limit yourself to traditional pinball machine designs, experiment! There are many things you can do with **Virtue/Pinball** that can't be done on a real game. For example, the **launcher** doesn't have to be placed at the bottom of the board.

PINBALL WORKSHOP INVENTORY

PART	POINT VALUE
Small Bumper	100
Large Bumper	200
Sling Shots	100
Kick Walls	100
Drop Targets	5,000
Moving Targets	5,000
Pege	5,000
Rollovers	100
Tracks	5,000 on entry
Spring	100 top surface
Ghost Ball	1,000 on release
Kick Hole	10,000 on entry
Spinner	1000 for each revolution
Worm Hole	5,000 on entry
One Way Gate	100 top surface
Jackpot	1,000,000 (when active)

ELECTRONIC ARTS LIMITED WARRANTY

Electronic Arts warrants to the original purchaser of this Electronic Arts software product that the medium on which this computer program is recorded is free from defects in materials and workmanship for a period of ninety (90) days from the date of purchase. This Electronic Arts software program is sold "as is," without express or implied warranty of any kind, and Electronic Arts is not liable for any losses or damages of any kind resulting from use of this program. Electronic Arts agrees for a period of ninety (90) days to replace, free of charge, any Electronic Arts software product,

postage paid, with proof of purchase, at the Electronic Arts Warranty Department. This warranty is not applicable to normal wear and tear. This warranty shall not be applicable and shall be void if the defect in the Electronic Arts software product has arisen through abuse, unreasonable use, misreatment or neglect.

LIMITATIONS - THIS WARRANTY IS IN LIEU OF ALL OTHER WARRANTIES AND NO OTHER REPRESENTATIONS OR CLAIMS OF ANY NATURE SHALL BE BINDING ON OR OBLIGATE ELECTRONIC ARTS. ANY IMPLIED WARRANTIES APPLICABLE TO THIS SOFTWARE PRODUCT, INCLUDING WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, ARE LIMITED TO THE NINETY (90) DAY PERIOD DESCRIBED ABOVE. IN NO EVENT WILL ELECTRONIC ARTS BE LIABLE FOR ANY SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES RESULTING FROM POSSESSION, USE OR MALFUNCTION OF THIS ELECTRONIC ARTS SOFTWARE PRODUCT.

Some states do not allow limitations as to how long an implied warranty lasts and/or exclusions or limitations of incidental or consequential damages so the above limitations and/or exclusions of liability may not apply to you. This warranty gives you specific rights, and you may also have other rights which vary from state to state.

RETURN AFTER WARRANTY - To replace defective media after the ninety (90) day warranty period has expired, send the original cartridge to Electronic Arts, address below. Enclose a statement of the defect, your name, your return address, and a check or money order for \$29.00.

Nick Coree comes from a bustling town with a popu-
lation of 42. Recoiling from the fever pitch of activity,
the then 14 year old Graphic artist and designer
became interested in "Bill Budge's Pinball
Construction Set." After constructing more than a
dozen games, Nick sent them to EA with the hope of
becoming a game designer. Ten years later he has
fulfilled his dream with his work on Virtual Pinball!

Bill Budge, introduced to computers by a high
school teacher, has made designing and program-
ming video games his life work. As a bored com-
puter-science student, Bill programmed his Apple II
to do something he had seen in a pizza parlor —
play Pong. As Bill watched transfixed, the glowing
dot trailed back and forth across the screen, his life
would never be the same. When not working, Bill
spends time with his wife Karin and daughter Natalie.
He plays tennis and windsurfs San Francisco Bay in
the summer and the coast of Chile in the winter.
